

BUT WHY SHOULD I CARE?

3,600 abortions are done every day in our country- one every 24 seconds! More American lives have been killed through abortion than all the soldiers killed in war throughout the history of our nation.

Women deserve better than abortion, as many will experience life long regrets as a result of this "safe, simple, surgical procedure". Killing is never the "best answer" to any problem. We are here to help women, while the abortion industry is there to make a profit hurting women for a life-time.

Just because abortion is legal, doesn't make it right. Slavery was once legal, but terribly wrong! Dehumanizing citizens based on the color of their skin was an atrocity in our nation's history, but now we discount the personhood of the unborn child merely because of it's size. Abortion is the Civil Rights issue of our time! Black women constitute only 6% of the population, but they comprise 36% of the abortion industry's clientele.

Because of all these reasons, won't you please seek your medical services elsewhere, rather than support what goes on in this abortion facility? For the small inconvenience of going elsewhere, you can send a very powerful message to the abortion industry that we do not support killing unborn children! Enclosed are some helpful alternatives to Planned Parenthood that we hope you will consider using, instead.

BUT I'M JUST HERE FOR SHOTS

Free/Low cost child and adult immunizations are available at the County Clinics. These include all immunizations, even flu shots and shots that would be necessary for leaving the country. This is also where your school district would refer you for shots for your children. The number below is where to start and you will be referred to the clinic nearest you that will serve your needs. The people who run this program are eager to help, and do not provide abortion services. Please use the County's immunization Program for your immunization needs:

BUT I'M NOT HERE FOR AN ABORTION!

It is understood that Planned Parenthood offers many services.

The goal of this brochure is to show you some of the alternative places here in Sacramento that you can go to obtain these same services WITHOUT giving your business to the nation's largest abortion provider. Please take your business to these organizations who do not destroy lives.

BUT I'M JUST HERE FOR A PREGNANCY TEST

There are several wonderful organizations in the Sacramento area that offer free pregnancy testing. The difference is that if you are pregnant you will be treated with dignity, provided all of your options, and offered all the resources you need to make your decision in an informed manner. You may also be offered an ultrasound of your baby and they will SHOW YOU your baby's ultrasound images. (Planned Parenthood will not.) These organizations will do everything they can to help you choose life for your baby. They also offer post-abortion counseling and support. (Planned Parenthood does not). If you are not pregnant, they will offer you counseling and information to help you avoid needing pregnancy testing services in the future. Please take your pregnancy testing needs to one of these wonderful,

life-affirming facilities:

BUT I'M JUST HERE FOR AN STD/HIV TEST

You can receive free STD/HIV testing at any facility that accepts Family Pact or Medi-Cal. These facilities are not abortion providers. If you don't have Family Pact or Medi-Cal, these facilities can help you get signed up, and then proceed with your testing. Please note that Alternatives Pregnancy Center will offer tests starting January 2008 (these tests will be administered free without the need for Family Pact or Medi-Cal):
